ACN 163 765 991

Date Adopted: 1 November 2018

1 INTRODUCTION

1.1 This Policy outlines:

- a) when Key Management Personnel (KMP) and other Employees may deal in Company Securities;
- b) when KMP and other Employees may deal in listed securities of another entity (because they may obtain Inside Information about another entity's securities while performing their duties for the Company); and
- c) procedures to reduce the risk of Insider Trading and the appearance of Insider Trading.

1.2 This Securities Trading Policy has been prepared to address the requirements of the ASX Listing Rules which requires the Company to have a trading policy that regulates Dealing in its Securities by its KMP during certain prohibited periods. The Securities Trading Policy has been prepared taking into consideration the following:

- a) the size, nature and stage of the development of the Company's research and development projects (see below for further details);
- b) obligations under the Corporations Act not to Deal in Company Securities whilst in possession of Inside Information;
- c) rights of shareholders under the Constitution of the Company to freely trade their shares; and
- d) contractual and statutory rights embedded in the Securities.

1.3 As noted above, this Securities Trading Policy has been prepared having regard to the current stage of development of the Company.

The Company is in the stage of research and development of biological drugs, namely utilising the LEAP technology and other uses of the technology from time to time.

The Company's main activities include:

- Clinical Trials: the company is preparing to go into pre-clinical trials in 2018 and clinical human trials in 2019;
- Manufacturing technology and knowhow: as well as the ongoing development of key underlying technologies, manufacturing know-how and scientific know-how;
- scientific studies: to better understand the technologies; and
- other uses: ongoing appraisal of other uses or the existing technology as well as underlying technology to support the LEAP process, as well as other uses of the technology or new technologies.

Examples of information which may be considered to be Inside Information include the following (which is not an exhaustive list):

- results from pre-clinical and clinical trials;
- new agreements with third parties (sale, JV, partnerships etc);
- advancements of the LEAP technology or other technologies being developed by the Company; and
- corporate activities (capital raisings, third party transactions).

Accordingly, the Closed Periods are primarily based around the release of this information, rather than focusing on the release of financial reports. This aspect of the Company's Securities Trading Policy may change should the stage of development of the Company change in the future.
