1. Details of the Offers

1.1 The Rights Issue

Exopharm Limited [ABN 78 163 765 991] (**EX1** or **the Company**) offers to its shareholders, as recorded on the share register at 7:00pm (Melbourne time) on the Record Date and who have a registered address in Australia or New Zealand (each an **Eligible Shareholder**), the right to participate in a non-renounceable rights issue of one (1) new fully paid ordinary share (**New Share**) for every one (1) existing share (**Share**) held at the Record Date (maximum aggregate of 157,211,533 New Shares, subject to rounding) at an issue price of 0.01 (1 cent) per New Share to raise up to approximately \$1.57 million before costs (**the Rights Issue**).

There is no minimum subscription amount for Eligible Shareholders. New Shares will be issued in response to valid acceptances of entitlements received. Fractional entitlements to New Shares will be rounded up.

Any New Share not taken up by Eligible Shareholders will form part of the shortfall (**Shortfall**). Eligible Shareholders may also apply for New Shares from the Shortfall. Further details are set out in section 1.5.

ACNS Capital Markets Pty Ltd T/A Alto Capital (**Alto Capital**) and Canary Capital Pty Ltd (**Canary Capital**) (Alto Capital and Canary Capital being collectively the **JLMs**) have been engaged by the Company as joint lead managers of the Rights Issue and the placement of the Shortfall. The Broker Options Offer is only made to and capable of acceptance by the JLMs (and/or their nominee(s)). Further details are set out in Section 1.6.

1.2 No Entitlement Trading

Entitlements to apply for and receive New Shares pursuant to the Rights Issue are not renounceable and, accordingly, there is no ability to trade rights on ASX or elsewhere.

1.3 Offers not underwritten

The Rights Issue and other Offers are not underwritten.

1.4 Non-eligible Foreign Shareholders

Only Eligible Shareholders, being those shareholders with addresses in Australia or New Zealand in the register of members of the Company as at the Record Date, are eligible to participate in the Rights Issue.

The Company has decided that it is unreasonable to make the Rights Issue outside Australia and New Zealand having regard for the:

- the number of holders in places where the Rights Issue would be made;
- the number and value of securities those holders would be offered; and
- the cost of complying with the legal and regulatory requirements of regulatory authorities in those jurisdictions.

The Company will be notifying each of the non-qualifying foreign shareholders of the Rights Issue and advise them that the Rights Issue will not be made to them.

At 22 March 2023 (the day before the date of this Prospectus), a total of 862,926 Shares (0.55% of existing issued shares) are held by 15 non-qualifying foreign shareholders in 6 different countries. The shares of non-qualifying foreign shareholders are equivalent to entitlements to apply for and receive a maximum of 862,926 New Shares (subject to rounding), being an aggregate amount of approximately \$8,629 at the \$0.01 (1 cent) issue price per New Share. The equivalent entitlements of non-qualifying foreign shareholders to New Shares will form part of the Shortfall further details of which are set out in section 1.5.

1.5 Shortfall

Allocation to Eligible Shareholders subscribing for Shortfall under the Rights Issue

Any part of your entitlement to New Shares under the Rights Issue not taken up will form part of the Shortfall.

If you are an Eligible Shareholder and you apply for your full entitlement to New Shares under the Rights Issue, you may also apply for more New Shares than the number shown on your Entitlement and Acceptance Form.

To apply for more New Shares than your entitlement (being an application for New Shares from the Shortfall) make your payment via BPay® or EFT as described in Section 6.2 for the number of New Shares you wish to subscribe for (being the Rights Issue offer price of \$0.01 (1 cent) per New Share multiplied by the number of New Shares for which you are accepting your entitlement plus any New Shares from the Shortfall) so that your payment is received no later than 5pm (Melbourne time) on the Rights Issue Closing Date, or such later date as the Company may specify. .

The issue of additional New Shares from the Shortfall in response to applications from Eligible Shareholders will depend on there being sufficient New Shares forming the Shortfall available after all valid acceptances of entitlements under the Rights Issue are fulfilled. Subject to scale back in the case of oversubscriptions as described below and compliance with applicable law, the Company will accept all valid applications for New Shares from the Shortfall that are received from unrelated Eligible Shareholders.

If the Rights Issue is oversubscribed due to the Company receiving subscriptions from Eligible Shareholders under the Rights for more additional New Shares than the number available under the Shortfall, the Company will scale back applications for New Shares from the Shortfall on the basis of giving priority to applications which increase holdings to more than a marketable parcel, then having regard to the applicant's holding as at the Record Date pro-rata to the holdings as at the Record Date of other applicants for additional New Shares.

Shortfall Offer

New Shares forming the Shortfall following the allocation to Eligible Shareholders under the Rights Issue will be offered under the Shortfall Offer on the same terms as New Shares under the Rights Issue (including at \$0.01 (1 cent) per New Share). The Directors reserve the right to issue Shortfall shares in consultation with the JLMs. The total number of New Shares to be offered under the Shortfall Offer will be equal to the number of New Shares offered under the Rights Issue, less the number of New Shares issued under the Rights Issue (including from the Shortfall) to Eligible Shareholders. The Company will release details of the number of New Shares offered under the Shortfall Offer as part of announcing the results of the Rights Issue.

The participants under the Shortfall Offer will be determined by the JLMs, who have been engaged by the Company to act as joint lead managers of the Rights Issue and the Shortfall Offer, subject to compliance with applicable law (including as described below). Details of the fees payable to the JLMs are set out in Section 1.6.

The Shortfall Offer is proposed to be open until the Shortfall Closing Date, which is the date that is three months after the Rights Issue Closing Date, unless closed earlier.

If the Rights Issue is fully subscribed then the Shortfall Offer will be withdrawn.

The Shortfall Offer is not underwritten.

General

Related parties including Directors and others to whom ASX listing rule 10.11 applies (and their associates) will not be eligible to subscribe for New Shares from the Shortfall without shareholder approval.

No shareholder or investor will be allocated New Shares from the Shortfall if that would result in the relevant interest of the shareholder (and its associates) exceeding 20% of the issued capital of the Company. Additional

New Shares will also not be issued to shareholders or others from under the Shortfall Offer where to do so would involve a breach of the ASX Listing Rules, the Corporations Act or any other applicable law.

1.6 JLMs and Broker Options Offer

The Company has engaged the JLMs to act as joint lead managers of the Rights Issue and the Shortfall Offer. For providing these services, the JLMs (and/or their nominee(s)) are to receive:

- 5% of the funds raised under the Rights Issue as a facilitation fee;
- 5% of the funds placed under the Shortfall Offer; and
- 3,000,000 options (each with an exercise price of \$0.01 (1 cent) and expiring 36 months from issue) (**Broker Options**), being the options which are the subject of the Broker Options Offer. The Broker Options are proposed to be issued to the JLMs and/or their nominee(s). The offer and issue of the Broker Options are conditional upon the full subscription amount under the Rights Issue being received, including following the allocation of any New Shares under the Shortfall Offer.

A summary of the terms upon which the JLMs have been appointed by the Company is set out in Section 11.

The Broker Options Offer is not underwritten.

1.7 ASX Listing

The Company will apply to ASX for admission of the New Shares to official quotation within 7 days of the date of this Prospectus. The fact that ASX may grant official quotation of the New Shares is not to be taken in any way as an indication of the merits of the Company or those securities.

If ASX does not grant permission for the official quotation of New Shares within 3 months after the date of issue of this Prospectus (or such period as is permitted by the Corporations Act), the Company, in its absolute discretion, will either repay the application monies to applicants without interest or (subject to any necessary ASIC or ASX waivers or consents being obtained) issue a supplementary or replacement Prospectus and allow applicants one month to withdraw their application and be repaid their application monies without interest.

The Broker Options will be unlisted and quotation of the Broker Options will not be sought. Official quotation of the Broker Options is not being applied for and is not a condition of the Offers. It is expressly not stated or implied that permission will be sought for the official quotation of the Broker Options or that official quotation of the Broker Options will be granted within three months or any other period after the date of this Prospectus.

2. Purpose of the Offers

The purpose of each of the Offers is set out below:

- The purpose of the Rights Issue is to raise up to approximately \$1.57 million (before costs). A lower amount will be raised if the Rights Issue and Shortfall Offer are not fully subscribed.
- The purpose of the Shortfall Offer is to make provision for issuing Shortfall shares prior to the Shortfall Closing Date, being that date that is three (3) months after the Rights Issue Closing Date unless closed early. If the Rights Issue is fully subscribed then the Shortfall Offer will be withdrawn.
- The purpose of the Broker Options Offer is to facilitate the issue of the Broker Options. As noted in Section 1.6, the offer and issue of the Broker Options are conditional.

3. Use of proceeds and financial effect of the Offers

Approximately \$1.57 million before costs will be raised if the Rights Issue is fully subscribed (including following the issue of New Shares under the Shortfall Offer). A lower amount will be raised if the Rights Issue is not fully subscribed.

Funds from the Rights Issue/Shortfall Offer will be used for working capital and to fund Exopharm's ongoing strategy which is to derive financial value from its investment into exosome manufacturing technologies and products.

This strategy is implemented through presentation of data and test results to support partnering activities, maintaining the Company's intellectual property portfolio and making its proprietary technologies available to pharmaceutical, biomanufacturing and biotechnology companies that want to harness exosome-delivery for their own products.

Exopharm is actively exploring potential transactions with third parties, and which could unlock the potential financial value of the Company's assets. These activities include, but not limited to, licensing or partnering its intellectual property, know-how and other intangible assets.

Seeking to maximise shareholder-value, Exopharm is also actively evaluating other programs and acquisition opportunities including, but not limited to, those that may complement its intellectual property.

The Board and Management continue to advance these goals whilst implementing further reductions in spend-rate following the Company's strategic review of the business late CY2022. Assuming the full subscription amount under the Rights Issue is received (including following the issue of New Shares under the Shortfall Offer), funds raised will be applied as set out in the table below:

Technical work to support partnering activities	\$200,000
Maintenance and enhancement of the Company's intellectual portfolio	\$100,000
Business development and commercial activities	\$280,000
General operating and compliance costs	\$231,500
Working capital	\$639,300
Costs of the Offers (see below)	\$119,200
TOTAL	\$1,570,000

The above table is a statement of current intentions as at the date of this Prospectus only. Accordingly, the above use of funds is indicative only and intervening events and new circumstances may affect how the funds raised are ultimately applied. The Board reserves the right to alter the allocation of funds. The allocations in the above table assume the Rights Offer raises approximately \$1,570,000 (the full subscription amount). Changes to the actual amount raised will be reflected in how the funds are applied.

The anticipated approximate costs of the Rights Issue will be approximately \$108,500 (excluding GST) as set out in the table below, based on the 5% fee payable to the JLMs assuming the Rights Issue is fully subscribed (including issuing any Shortfall shares) and estimates for other costs:

Particulars	Amount (\$) (ex GST)
JLM fees (maximum) *	\$78,600
Legal, printing and postage	\$15,000
Registry Fees	\$10,600

Particulars	Amount (\$) (ex GST)
ASIC and ASX Fees **	\$15,000
TOTAL	\$119,200

* Represents the maximum cash fee that may be payable to the JLMs, being 5% of the total amount under the Rights Issue (including any issue of Shortfall shares). Further details of the fees payable to the JLMs and options which may be issued to the JLMs and/or their nominees are set out in Section 1.6.

** Assumes full subscription of the Rights Issue and issue and quotation of 157,211,533 New Shares. The ASX fees will be lower if the Rights Issue is not fully subscribed.

If the Rights Issue is fully subscribed then the cash reserves of the Company are anticipated to increase by approximately \$1.45 million, being approximately \$1.57 million less the anticipated approximate costs of the Rights Issue of \$119,200 excluding GST (above). Cash reserves of the Company will be increased by a lower amount if the Rights Issue is not fully subscribed.

As at the date of this Prospectus, the Company has approximately \$2,123,000 cash on hand plus anticipated cash inflows of approximately \$61,000, making approximately \$3,635,000 (including the above anticipated approximate amount of \$1.45 million after costs) available for the operations of the Company going forward if the Rights Issue (including the Shortfall Offer) is fully subscribed.

4. Effect on the Capital Structure of the Company

4.1 Shares and Convertible Securities

Capital Structure

The tables below set out the existing capital structure of the Company and the effect on the Company's capital structure of the Rights Issue if fully subscribed (including following the issue of New Shares under the Shortfall Offer) and the Broker Options are issued under the Broker Options Offer. These tables assume that no further securities are issued by the Company other than New Shares under the Rights Issue (including the Shortfall Offer).

SHARES

	Number	%
Existing ordinary shares	157,211,533	50%
New Shares under Rights Issue (maximum)*	157,211,533	50%
Total fully paid ordinary shares post Rights Issue*	314,423,066	100%

* Subject to rounding. The number of New Shares to be offered under the Shortfall Offer will be equal to the number of New Shares offered under the Rights Issue, less the number of New Shares issued under the Rights Issue (including from the Shortfall) to Eligible Shareholders. The percentage represented by New Shares will be less if not all Shares offered under the Rights Issue or if applicable the Shortfall Offer are issued.

OPTIONS

The existing and proposed options of the Company are set out in the tables below:

Listed/Unlisted	Number of options	Expiry Date	Exercise price
Unlisted	1,500,000	9 November 2025	\$0.40

Listed/Unlisted	Number of options	Expiry Date	Exercise price
Unlisted	1,500,000	9 November 2025	\$0.60
Unlisted	1,500,000	9 November 2025	\$0.90
Unlisted (Broker Options)*	3,000,000	36 months from issue	\$0.01

* The offer and issue of the Broker Options are conditional. Refer to Section 1.6 for further information.

CONVERTIBLE NOTES

On 9 March 2023 the Company issued 1 million convertible notes. Subject to the Company obtaining necessary legal, regulatory and shareholder approvals, the notes are to convert automatically upon completion of the Rights Issue (that is, the issue of all New Shares offered under the Rights Issue including Shortfall shares) or (if not already automatically converted) may be converted by the holders between 1 May and 9 December 2023. The conversion price is \$0.008 (0.8 cents). If all the notes were to be converted, the number of shares on issue would increase by approximately 125 million shares. The maturity date of the notes is 9 March 2024 (the anniversary of the issue date). The notes are unsecured, and do not bear interest. The notes do not entitle the holder to participate in the Rights Issue. Further details of the notes, including a copy of the subscription deed containing the full terms of the notes, are contained in the Company's announcement to ASX regarding the issue of the notes of 9 March 2023 and the cleansing notice and Appendix 3G released to ASX in conjunction with the announcement.

4.2 Dilution and control

Shareholders who take up their full entitlement in the Rights Issue will not be diluted and will maintain (or, in the event of undersubscriptions, increase) their existing proportional (percentage) interest in the Company.

The percentage shareholding in the Company of shareholders who do not take up their rights pursuant to the Rights Issue will be diluted by the issue of New Shares under the Rights Issue and the Shortfall Offer. Examples of the impact of dilution on existing shareholders where a shareholder does not take up its entitlement and the Rights Issue is 50% subscribed or 100% subscribed are set out below:

Shareholder (example)	Holding at the Record Date	% at Record Date	One for one entitlement under Rights Issue	Holding if entitlement not taken up	As % of total shares if Rights Issue 50% subscribed	As % of total shares if Rights Issue 100% subscribed
A	1,000,000	0.64%	1,000,000	1,000,000	0.42%	0.32%
B	2,000,000	1.27%	2,000,000	2,000,000	0.85%	0.64%
C	5,000,000	3.18%	5,000,000	5,000,000	2.12%	1.59%
D	10,000,000	6.36%	10,000,000	10,000,000	4.24%	3.18%
E	20,000,000	12.72%	20,000,000	20,000,000	8.48%	6.36%

Notes to Table:

- All percentages are rounded to two decimal places.
- It is assumed the notional Shareholders in the example above do not acquire or dispose of shares.
- The above does not take into account the issue of any additional shares other than New Shares as provided for under the Rights Issue (including the Shortfall Offer).

As at the date of this Prospectus according to substantial holding notices given to ASX the Company has only one substantial holder (a holder of a relevant interest in more than 5% of the issued voting shares of the Company), being Altnia Holdings Pty Ltd (Dixon Family A/C), a related party of Dr Ian Dixon. Dr Dixon has confirmed he and his associates will not participate in the Rights Issue, and therefore the substantial holder's relevant interest will not increase. Further details including the potential effect on the substantial holder's relevant interests are set out in Section 10.1.

5. Risks

The New Shares and Broker Options offered under this Prospectus are considered highly speculative. An investment in the Company carries risk. The Directors strongly recommend potential investors consider the risk factors described below, together with information contained elsewhere in the Prospectus.

This section identifies circumstances the Directors regard as risks associated with investment in the Company and which may have a material adverse impact on the financial performance of the Company if they were to arise.

Specifically:

- the New Shares and Broker Options are subject to specific risks (refer to section 5.1); and
- the business, assets and operations of the Company are subject to specific risk factors that could potentially influence the performance of the Company in the future (refer Section 5.2); and
- there are general investment and market risks (refer Section 5.3).

Where possible, the Directors aims to manage these risks by carefully planning the Company's activities and implementing risk control measures. However, some of the risks identified are highly unpredictable or are out of the control of the Company and the Company is therefore limited to the extent it can effectively manage them.

These risk factors are not intended to be an exhaustive list of risks to which the Company is, or will be, exposed.

5.1 Risks associated with the Offers

(a) Value of securities and share market conditions

The market price of the Company's securities is subject to varied and unpredictable influences on the market for equities. Market conditions and lack of liquidity may affect the value of the Company's securities regardless of the performance of the Company. The trading price of the New Shares and shares (including the underlying shares issued upon exercise of Broker Options (if any), may fall as well as rise.

(b) Taxation consequences

The issue of New Shares, and the exercise of Broker Options, may have taxation consequences depending on the particular circumstances of the recipient. You should seek your own professional advice before investing in the Company.

(c) Dilution

The issue of New Shares will result in holders who do not take up their entitlement under the Rights Issue being diluted. Any such dilution may be material. The number of New Shares to be subscribed for by an Eligible Shareholder to not have their holding diluted in the Company is dependent upon the current shareholding of the Eligible Shareholder and the total number of New Shares issued.

The issue of Broker Options will not dilute shareholders until shares (if any) are issued on exercise of Broker Options. The exercise of Broker Options into shares will result in the dilution of shareholders who either do not hold, or do not exercise, Broker Options.

(d) Liquidity

No assurance is given that there will be, or continue to be, an active market for the New Shares.

(e) Exercise price of Broker Options

There is no guarantee that the share price will be greater than the exercise price of Broker Options (\$0.01 (1 cent)) up to the expiry date of Broker Options (36 months from issue). Accordingly, there is a risk that Broker Options will be out of the money during the exercise period, which will affect the value of the Broker Options. The offer and issue of the Broker Options are conditional as set out in Section 1.6.

5.2 Company Specific Risks

(a) Future capital requirements and additional funding

The Company is yet to generate material income or profit from its operations. The Company's implementation of its business strategy will depend on its ability to continue to raise additional funds. The Company's ability to raise additional funds, if required, will be subject to factors outside of the control of the Company and its Directors, including cyclical factors affecting share markets, the equity capital market for biotechnology stocks and the economy generally. Any equity financing may be dilutive to Shareholders and any debt financing (if available) may involve restrictive covenants, which may limit the Company's operations and business strategy. If, for any reason, the Company is not able to raise future funds, its ability to achieve milestones or continue future development/commercialisation /product would be significantly adversely affected.

(b) Joint ventures, contracts and agreements

The Company seeks to derive income from its activities, including deriving technology licensing income and other commercialisation activities.

Generation of income requires joint ventures, contracts or agreements, each of which involves third parties. The Company has no control over the actions or timing of third parties in relation to potential joint ventures, contracts or agreements, and there is significant risk that the amounts or timing of such arrangements could be smaller or longer respectively than anticipated or planned for by the Company.

(c) Operating and Regulatory Risk

The research, development and commercialisation of biotechnology and medical products is complex and time-consuming. In some instances, experimental or innovative activities will fail to achieve the desired outcomes. In other cases, further work may be required, necessitating additional expenditure and extended timelines.

The research, development and commercialisation of biotechnology and medical products is subject to a number of regulations prescribed by government authorities in Australia and overseas. Generally, these requirements are rigorous and complex. In some cases, data might be interpreted by another party differently than the Company. In other cases, further data may be required, necessitating additional expenditure and extended timelines. The deployment of the Company's technology or products may be seen as unsafe, non-eficacious, difficult or uncommercial.

(d) Technology adoption risk

To date there have been no approved exosome medicines approved for sale. The use of exosomes in medicines is an emerging field with associated technology adoption risks. Such risks include slower than expected adoption, replacement with alternative technologies, adverse cost-benefit analysis and adverse regulatory oversight and determinations. There is no guarantee that the Company will be commercially successful with its technologies or products.

(e) Competition risk

The biotechnology and biomanufacturing sectors are highly competitive and subject to rapid changes that can be unforeseen or difficult to respond to. Many other companies in this sector may have access to much larger resources which could impact negatively on the Company's ability to achieve its longer term objectives. Other companies may be developing technologies and/or products that compete with the Company, potentially negatively impacting on the potential financial value of the Company's results.

There already exist alternative drug-delivery technologies, and the Company must compete with such alternatives, some of which are established.

(f) Intellectual Property

The Company's success depends, in part, on its ability to obtain patents, protect trade secrets and operate without infringing third parties' property rights.

The Company's ability to protect its intellectual property is a process which is complex and outcomes which can be highly uncertain. If a third party infringes the Company's patent(s), there can be considerable cost to pursue redress, and the outcomes of that process can be uncertain. The Company's commercialisation activities and outcomes also depend upon its freedom to operate in its field, a situation which can be complex and outcomes which can be highly uncertain.

(g) Reliance on key personnel

The conduct of activities and achievement of outcomes relies upon the core competencies of a small number of key personnel. Given the small size of the Company's team, there can be no assurance that there will be no detrimental impact on activities and outcomes if one or more of these employees cease their employment for any reason. Sickness or incapacity in key staff could also have a detrimental impact on activities and outcomes.

(h) Dependence upon service providers

The Company relies upon independent third party service providers and third-party collaborators to complete the development and commercialisation of its technologies and products. The Company is therefore exposed to risks over which it has little or no control. These risks could in turn negatively impact the progress, success or timing of activities and outcomes.

(i) Insurance and uninsured risks

The Company, where economically feasible, may insure its operations in accordance with industry practice. However, even if insurance is taken out, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered, or fully covered, by insurance could have a material adverse effect on the business, financial condition and results of the Company. Insurance of all risks associated with mineral exploration and production is not always available and, where available, the costs can be prohibitive.

(j) Potential acquisitions

As part of its business strategy, the Company may make acquisitions complementary to its business activities. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions, as well as any risks which may be associated with what is acquired by the Company.

5.3 General Risks

(a) Pandemic Risk

The Company's operations may be adversely affected in the short to medium term by the economic uncertainty caused by a pandemic, including as a result of the COVID-19 pandemic which remains ongoing. Although the impacts of COVID-19 appear to have stabilised in most countries including Australia, no guarantee can be given governmental or industry measures taken in response to COVID-19, or any potential future pandemic (if any), will not adversely impact the operations, and are likely to be beyond the control, of the Company.

(b) Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may adversely affect the Company's activities, as well as its ability to fund those activities. Further, share market conditions may affect the value of the Company's securities regardless of the Company's operating performance. Share market conditions are affected by many factors as:

- general economic outlook;
- interest rates and inflation rates;
- currency fluctuations;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

(c) Regulatory Risks

Changes in government, financial policy, taxation and other laws in any local and/or international markets or regions cannot be predicted and may affect the Company's ability to carry on its proposed activities, restrict the Company in achieving its objectives or may result in increased compliance costs or complexities in managing the Company's proposed operations and activities.

The Company is also subject to various regulatory requirements, including technology and accounting requirements. Changes to standards, policies, guidelines, interpretations or principles may affect the Company's ability to carry out its activities and/or achieve its objectives. The Company cannot control or predict changes to regulatory requirements, which may adversely affect the Company.

(d) Litigation Risks

The Company is exposed to possible litigation risks including contractual disputes, disputes arising from the sale or disposal of Company assets, shareholder actions, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.

(e) Unforeseen risks

There may be other risks which the Directors and/or management of the Company are unaware of at the time of issuing this Prospectus which may impact upon the Company, its operations and/or the value and performance of the securities of the Company, including the New Shares.

(f) Inability to pay dividends or make other distributions

The Company has never declared or paid dividends on its share capital, and the Company does not expect to do so in the short to medium term. There is no guarantee that dividends will be paid on shares in the future. Any distribution is a matter to be determined by the Board in its discretion having regard to the financial performance and position of the Company and applicable laws.

5.4 Investment Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or in connection with an investment in the Company. The above risk factors, and other risk factors not specifically referred to above, may materially affect the future financial performance of the Company and the value of the securities offered under this Prospectus.

New Shares carry no guarantee with respect to the payment of dividends, returns of capital or market value. The Company does not expect to declare any dividends for the foreseeable future.

Potential investors should consider that the investment in the Company is highly speculative.

6. Application process

6.1 Choices available under the Rights Issue

Eligible Shareholders may:

- exercise their rights to participate in the Rights Issue (and take up their entitlement) in full; or
- exercise their rights to participate in the Rights Issue (and take up their entitlement) in full and apply for additional New Shares from the Shortfall (if any); or
- exercise their rights to participate in the Rights Issue (and take up their Rights Issue entitlement) in part; or
- take no action under the Rights Issue offer in this Prospectus and allow their Rights Issue entitlement to lapse.

New Shares represented by Rights Issue entitlements not taken up will become part of the Shortfall. The Company may reject an acceptance where payment of the acceptance amount is not received, or without prejudice to its rights, issue New Shares in response to the acceptance and recover outstanding acceptance amount from the recipient. The Company accepts no responsibility for failure by your stockbroker or other third parties to carry out your instructions.

6.2 Completing a Rights Issue Entitlement and Acceptance Form

You do not need to return a completed personalised acceptance form if paying by BPAY® or EFT.

For payments BPAY or Electronic Funds Transfer (EFT):

Your acceptance of entitlements to New Shares or payment may not be effective if received after 5:00pm (Melbourne time) on the Rights Issue Closing Date or such later date as the Company may specify, in which case no New Shares would be issued to you in respect of your acceptance or payment, and any payment received will be refunded to you after the date of allotment in accordance with the Corporations Act, without interest.

The amount payable on acceptance will be deemed not to have been received until the Company is in receipt of cleared funds. Payments in cash will not be accepted.

If the amount of payment received is insufficient to pay in full for the number of New Shares you have accepted or is more than required for the number of New Shares you have accepted, you will be taken to have accepted the lesser of your entitlement or such whole number of New Shares which is covered in full by your payment.

If paying by BPAY – available to Australian registered Eligible Shareholders:

To accept your entitlement and pay via BPAY, you should:

- read this Prospectus and the Entitlement and Acceptance Form in their entirety and seek appropriate professional advice if necessary; and
- make your payment via BPAY for the number of New Shares you wish to subscribe for (being the Rights Issue offer price of \$0.01 (1 cent) per New Share multiplied by the number of New Shares for which you are accepting your entitlement plus any New Shares from the Shortfall) so that it is received no later than 5pm (Melbourne time) on the Rights Issue Closing Date, or such later date as the Company may specify.

You can only make a payment via BPAY if you hold an account with an Australian financial institution.

If you choose to pay via BPAY you are not required to submit the Entitlement and Acceptance Form.

If your BPAY payment is received by 5:00pm (Melbourne time) on the Rights Issue Closing Date or such later date as the Company may specify, New Shares accepted are anticipated to be issued to you on or before the date set out in the timetable on page 4 of this Prospectus (which date may change without notice).

You should be aware that your financial institution may implement earlier cut off times with regards to electronic payment and should therefore take this into consideration when making payment. You may also have your own limit on the amount that can be paid via BPAY. It is your responsibility to check that the amount you wish to pay via BPAY does not exceed your limit. The Company and the Share Registry accept no responsibility for unsuccessful, delayed, or incomplete BPAY payments.

If you have multiple holdings you will have multiple BPAY reference numbers. To ensure that you receive your entitlement in respect of each holding, you must use the customer reference number shown on each personalised Entitlement and Acceptance Form when paying for any New Shares you wish to accept your entitlement for in respect of that holding. Payments in excess of the amount payable for one holding will not be treated as payment for another holding, and the excess will be refunded to the applicant without interest.

If paying by Electronic Funds Transfer (EFT) – available to New Zealand registered Eligible Shareholders:

To accept your entitlement and pay by EFT, you should:

- read this Prospectus and the Entitlement and Acceptance Form in their entirety and seek appropriate professional advice if necessary; and
- make your payment via EFT for the number of New Shares you wish to subscribe for (being the Rights Issue offer price of \$0.01 (1 cent) per New Share multiplied by the number of New Shares for which you are accepting your entitlement plus any New Shares from the Shortfall) so that it is received no later than 5pm (Melbourne time) on the Rights Issue Closing Date, or such later date as the Company may specify. Your payment via EFT must include your unique reference in order to reconcile the payment to your holding.

If you choose to pay via EFT you are not required to submit the Entitlement and Acceptance Form.

The offer of New Shares under the Shortfall Offer is only made to and capable of acceptance by investors identified by the JLMs to participate. Further details of the Shortfall Offer are set out in Section 1.5. The Shortfall Offer is open for acceptance until the Shortfall Closing Date, being three months after the Rights Issue Closing Date unless closed earlier.

Recipients of this Prospectus should make their own independent investigation and assessment of the Company, its business, assets and liabilities, prospects and profits and losses, and the risks associated with investing in the Company. Independent expert advice should be sought before any decision is made to accept the Offers (or any of them), or to acquire New Shares, Broker Options or other securities of the Company.

7. Continuous Disclosure Obligations

This Prospectus is issued by the Company in accordance with the provisions of the Corporations Act applicable to a prospectus for continuously quoted securities or securities convertible into continuously quoted securities.

Section 713 of the Corporations Act enables a company to issue a special prospectus where the securities under that prospectus are continuously quoted securities within the meaning of the Corporations Act. This generally means that the relevant securities are in a class of securities that were quoted enhanced disclosure securities at all times during the 3 months before the date of this Prospectus and other requirements relating to the Company not being subject to various exemptions and orders under the Corporations Act within the last 12 months are met.

In summary, special prospectuses are required to contain information in relation to the effect of the offer of securities on the company and the rights and liabilities attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or

prospects of the issuing company. Accordingly, this Prospectus does not contain the same level of disclosure as a prospectus of an unlisted company or an initial public offering prospectus.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the date of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

For the purpose of satisfying section 713(5) of the Corporations Act a prospectus must incorporate information that:

- (a) has been excluded from a continuous disclosure notice in accordance with the ASX Listing Rules; and
- (b) is information that investors and their professional advisors would reasonably require for the purpose of making an informed assessment of:
 - the assets and liabilities, financial position and performance, profit and losses and prospects of the Company; and
 - the rights and liabilities attaching to the securities being offered.

The prospectus must contain this information only to the extent to which it is reasonable for investors and their professional advisors to expect to find such information in the prospectus. The Company is not aware of any matters that need to be disclosed under this section of the Corporations Act that have not been previously disclosed or which have not been set out in this Prospectus.

The Company operates an ongoing business and reports regularly on its activities. The Company from time to time seeks to engage in discussions on an ongoing basis in respect of potential opportunities. Funds may be used to fund the costs associated with identifying, investigating and pursuing such opportunities. While the Company may seek to negotiate such opportunities there is no certain any such arrangement(s) will be finalised on particular terms, at a specific time, or at all. The Company will make further announcements in respect of any such opportunities (if any) in accordance with its continuous disclosure obligations as developments, if any, occur (however no guarantee can be given that such developments, if any, will occur).

As a disclosing entity under the Corporations Act, the Company is subject to regular reporting and disclosure obligations. Copies of documents lodged with ASX and ASIC in relation to the Company may be obtained from or inspected by accessing the respective web sites.

Any person may request, and the Company will provide free of charge, a copy of each of the following documents during the acceptance period of this Prospectus:
